

Hello, my name is Kevin Jowett. I'm the owner-operator of [Revolution Off Road in Orlando](#), Florida. We're an off-road attraction park, located 15 miles west of Disney World. As an off-road adventure park, we do ATVs, we do a dune buggy experience, a thing called a Mucky Duck, which is an amphibious, eight wheel vehicle, which goes on land and water, archery, and bass fishing. Our ATV experience last around two hours. That's from the time you get here, to the time you leave. That includes all the safety briefings.

You have to be 16 years and above to drive the ATVs. Safety is one of the most important things that we're interested in. So when you get here, we will sign you in. We'll go through a safety briefing. We'll supply you with helmet, goggles, and gloves. You'll have a guide that will take you over 230 acres of different tracks and trails. There's one thing guaranteed, you will get dirty. Maybe very, very dirty.

he dune buggy experience, we use CAN AM 1000 CC Commander Xs. We have a two mile track. You get five laps at the two mile track, so you get 10 miles in total. Again, we supply you with helmets and goggles. Safety is paramount. We have a guide that will take you through, show you exactly how to drive them. We'll go over, show you the course, and then it's up to you to do your five laps.

There's our Mucky Duck experience, it's very unique. They're called Argos. We call them the Mucky Duck, because they go through some of our muckier trails, as well into the lake and out again. It's definitely a family ride. A guide will go out with you, because safety is really important, but you can have a driver, and up to three passengers in each machine. Again, you will get dirty.

We also do archery here. We have a target range, which goes up to Olympic lengths. We teach from seven years and above. I have four level two coaches on staff at all time. We also have a 3D range, for the more experienced archer. We have some here next to our target range. We also have some out in the woods.

Bass fishing, we're quite unique. We have a 65 acre lake lake that is stocked with trophy bass. It's an unusual lake, because it's very deep for Florida. We go up to 40 feet deep. We provide not only the boat, the guide, all the tackle that you need, and also a fishing license and soft drinks. The guides sometimes like to get out nice and early in the morning, to get the early bite. We've got some big fish out here. The biggest fish is over 14 pounds.

If you come, you may be very lucky. See if you can beat that for us.

There's just a few things to remember when you come to see us. Sunscreen is really important. If you've got sunglasses and a hat, that also helps. Most importantly, don't forget to wear enclosed shoes, and a T-shirt that you don't mind getting dirty. Thank you for letting me tell you a little bit about [Revolution Off Road](#).
